The SHOWER SHIRT®

## IMPORTANT: PLEASE READ

Tighten the cinch strap and drawstring on The SHOWER SHIRT® as snug as possible! DO NOT stand directly under the water stream while showering. The SHOWER SHIRT® provides better protection for patients who lean over while washing their hair.

## Testimonials:

"I thank you for your product. I am a physician and patient with a medi-port. I tried numerous plastic adhesive covers without success. Your product allows me to safely shower, even when my port is accessed. Everything stays dry and lowers my risk of infection. I appreciate what your product does for mastectomy patients but it has made a world of difference for me as well." —**Dr. Sean M. Kelly, Berkshire Medical Center**

"The Shower Shirt is a Godsend for me. Being a dialysis patient with a neck catheter, my husband found it online and it has worked perfectly! My catheter can't get wet and the Shower Shirt has kept it dry for almost 3 months and counting...I love it!" —**L. Thom, Dialysis Patient**

"This shirt is amazing and well designed. I had a bilateral mastectomy and unable to shower until my surgical drains were removed. This shirt was a lifesaver. So easy to put on and kept the covered area completely dry. Also included great tips for washing one's hair — bend at the waist and lean your head down under the shower spray! This shirt was more than I expected to pay, but it was also very well made, high quality, and thoughtfully designed. When you're recovering from surgery and trying to protect a delicate surgery area, you definitely need a quality garment to protect you so you can take a shower and feel somewhat human again." —**RG, Breast Cancer Patient**

"I was hesitant to buy what looks like a \$50 garbage bag, but I'm so glad I did!!! I was able to shower 2 days after surgery, keep my chest dry and drains in place securely. We Seran wrapped my chest just in case but even without the Seran Wrap I was kept dry by this product. I'll need to use this again during reconstruction, so I believe it's worth the "investment". If your google search led you here... just get it. Highly recommend for mastectomy/reconstructive surgery." —**K. Berrios, Breast Cancer Patients**

The SHOWER SHIRT® (the "Product") is designed, if used properly, to restrict water from coming into contact with surgical sights while showering. Follow all instructions carefully. The Product is not guaranteed to reduce or prevent infection. Post-surgical infections can occur for many known and unknown reasons. In the event you experience any signs of infection as described by your physician, contact your physician immediately. In no event shall The SHOWER SHIRT® Company, LLC be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, whatsoever arising out of or connected with the use or misuse of its products.
